

Community Engagement in the Northern Territory

2022 activities update

A message from Stuart Knowles

INPEX General Manager, Northern Territory

On behalf of the INPEX NT team, I'd like to acknowledge outgoing General Manager Roland Houareau for his leadership, passion, and hard work throughout the past few years here in Darwin and wish him all the best with his next role within our New Energy Business Australia team.

In 2022, some four years since the commencement of operations at Ichthys LNG, we achieved an exceptional milestone of 750 total cargoes safely exported. On a global scale, these cargoes represent critical energy security to several countries, including Japan. At a local level, these cargoes represent significant contributions and positive impacts through direct and indirect employment, taxation payments, social investments and capital and operational expenditure resulting in local contract work.

Looking ahead, our plan is to achieve many more great milestones throughout this decade and continue to contribute social and economic benefits and opportunities within the NT.

In early 2022, INPEX CORPORATION released its long-term strategy and medium-term business plan, collectively referred to as "INPEX Vision@2022", which maps out our commitment to a net-zero carbon society by 2050, while supporting society's growing demand for secure, affordable, and clean energy.

Simply put, our focus is on decarbonising our operations, while maintaining safe and stable production at Ichthys LNG, for years to come.

In 2022, as international borders re-opened, we welcomed many business visitors to Darwin, including INPEX CORPORATION President and CEO, Takayuki Ueda, who was thrilled to return to his 'second home' where he was overwhelmed at the warm hospitality he received. Ueda san commented that returning to Darwin after the COVID-19 imposed hiatus and being welcomed by Territorians in such a genuine way re-affirmed building the Ichthys LNG onshore processing facilities in Darwin was the right decision.

INPEX CORPORATION and the Northern Territory Government formally acknowledged mutual targets in July 2022 to transition to a net-zero carbon emissions future, with our Tokyo-based top management hosting the Hon Natasha Fyles MLA on her first overseas business trip as Chief Minister of the Northern Territory. Together, we signed

"Our Commitment to Advancing Shared Interests Between INPEX and the NT Government".

In mid-2022, we safely completed our second major maintenance campaign at Bladin Point, involving approximately 1800 people and more than 135,000 work hours. Pleasingly, this activity was completed safely and efficiently by our great team of people.

Throughout the year, INPEX and the Ichthys Joint Venture continued to support our local community with highlights including expanding our major partnership with the iconic Darwin Festival and Energy Club NT as well as continuing our existing partnerships with AFLNT, Australian Red Cross's Youth Shak, Australian Volunteer Coast Guard and Foodbank NT. We also embarked on a new partnership with the Starlight Foundation, providing support for the Starlight Express Room at Royal Darwin Hospital. At INPEX we are pleased to be supporting positive outcomes in the communities we work alongside and live in, through our long-term strategic partnerships.

Our A\$ 90 million voluntary offsets programs also continued to deliver benefits through the Aboriginal Ranger Grants program, NT Farmers Association water productivity, efficiency and sustainability project, Savanna Fire Management program and the integrated marine monitoring program in Darwin Harbour.

We continued to deliver the INPEX Stretch Reconciliation Action Plan (RAP), through nurturing relationships with and creating opportunities for Aboriginal and Torres Strait Islander peoples and have delivered tangible outcomes across a range of areas including employment and business engagement.

As I step into the General Manager NT role and reflect over the past 12 months – it really has been a productive, challenging and rewarding time for INPEX and I look forward to working closely with my colleague Dave Dann, Onshore Operations General Manager and leading the business in the NT through the next chapter.

We sincerely thank everyone in the NT community for your support in 2022 and onwards into 2023.

Kind regards,

INPEX CORPORATION highlights

Vision@2022

In early 2022, INPEX CORPORATION released its Long-term Strategy and Medium-term Business Plan – collectively referred to as “INPEX Vision@2022” – and it had some very good news for Australia.

INPEX Vision@2022 lays out the company’s updated long-term strategy towards 2030 and 2050 and builds on the ‘Business Development Strategy - Towards a Net Zero Carbon Society by 2050’ released in 2021, outlining INPEX CORPORATION’s climate change response goals and its business strategies towards a net zero carbon society.

Our medium-term business plan highlights INPEX’s specific goals from 2022 to 2024 and reflects the current management environment and social landscape.

INPEX Toyko management team hosted the Hon Natasha Fyles MLA on her first overseas business trip as Chief Minister of the Northern Territory

INPEX is actively focused on increasing stable and clean energy supply and security for the Asia/Oceania region, as we contribute to a lower carbon future – as mapped out in our INPEX Vision@2022, which states our intent to invest in five net-zero businesses globally by 2030.

Also contributing to a cleaner product slate, by 2030, INPEX’s gas to oil investment ratio will increase to 70:30 from approximately 50:50 today. We believe Australia and the Northern Territory in particular, is well positioned to contribute to the energy transition, while simultaneously enhancing energy security in the region.

Australia has been identified as one of INPEX CORPORATION’s five core business areas along with Europe, Abu Dhabi, Southeast Asia and Japan.

INPEX CEO Territory visit

In June, INPEX CORPORATION President and CEO Takayuki Ueda returned to Darwin for the first time since 2019 and was welcomed warmly back to the Territory.

During his visit, Ueda-san engaged with local businesses and employees at a special breakfast at the Darwin Trailer Boat Club, met with various NT stakeholders, visited Ichthys LNG onshore facilities to speak with our staff; and a welcome reception was also held at Parliament House.

Ueda-san was very pleased to return to the Territory, he described the experience of being back like receiving a “warm hug” and reiterated that Darwin was like a second home for INPEX and the right place in which to build the Ichthys LNG onshore facilities.

Okawa san, Ueda san and Tetsu enjoyed an afternoon at the V8 Supercars.

INPEX Australia President Director Okawa san presented a keynote address during NT Resources week in August.

Local employment

Ashley Stephenson enjoys his role working at the Ichthys LNG Onshore Facilities laboratory.

Close to home for Ashley

Ashley Stephenson worked as a lab technician for more than a decade in the mining industry before securing a laboratory analyst position with INPEX in July 2021 as part of the Solid Pathways Program.

Ashley is Darwin born and bred and his family are Woolwonga people from the Frances Creek area near Pine Creek.

Initially Ashley found it difficult to transition from mining to the energy industry until he joined the INPEX Solid Pathways Program, which provides direct learning and employment opportunities for Aboriginal and Torres Strait Islander peoples in the energy industry.

"I had applied for jobs, but not got to the interview stage because I didn't have any experience in the energy industry," he said.

"I think that is why this program is good for our mob to get in, because most of us won't have experience in the gas industry.

"The program is good because for someone like me trying to get into the industry, an Aboriginal person, it can be hard to get a foot in the door – you might have the actual job title experience, but not the industry experience."

Ashley is one of 49 Aboriginal and Torres Strait Islander employees at INPEX and one of 17 people who are in the Solid Pathways Program. He says seeing the familiar faces on site of people he grew up with in Darwin and the short drive home are some of the positives for working with INPEX as a local employee.

"It is good because I see people on site I recognise from around town, so there is familiarity in that sense," Ashley said.

"Normally if you wanted a job like this you had to be in Queensland or Western Australia. It is also so close to town, so you don't have to fly in and fly out – I prefer to just drive home."

Sea change for Hollie

Taking up the opportunity of a coveted INPEX Production Technician Traineeship at the Ichthys LNG facilities in Darwin was a life-changing decision for former psychologist Hollie Smith.

Hollie is one of more than 25 locals who have taken advantage of a two-year traineeship through the INPEX Production Technician Traineeship Program to gain extensive technical knowledge in hydrocarbon processing and support systems, while developing skills to operate process facilities.

After studying a Bachelor of Psychology in Perth, Hollie transitioned into work health and safety roles for mining companies in the Pilbara, before taking up a position with INPEX's Health, Safety and Environment team and moving to Darwin in 2014.

With support from her supervisor, Hollie's career trajectory changed dramatically when she was encouraged to enrol in a traineeship to complete a Certificate III in Process Operations as part of the INPEX Production Technician traineeship program.

Hollie spends her days on the Ichthys LNG product loading jetty in Darwin Harbour supporting the loading of LNG, LPG and condensate onto enormous carriers that sit as high as 10-storey (30 metre) buildings, and as long as three soccer fields (300 metres).

Hollie Smith undertook a career change when she enrolled in a Production Technician traineeship with INPEX.

"Our crew, we tie them up, we let them go, we connect the arms, we load them, we do all the pressure tests – that's our role to make sure that the loading and unloading of the shipping schedule goes safely and smoothly," Hollie said.

"It's definitely life changing, it's the best move that I have made, from a professional point of view I feel like I make a difference at the grassroots level," Hollie said.

"I love the camaraderie of the crew and working outside suits me.

"From a work-life balance, it allows me more time with my children during my three weeks off and being there on the weekend, it definitely suits my lifestyle.

"The kids have an outdoorsy lifestyle and I really think that the Territory is rich with opportunity compared to a lot of places."

Celebrating our people

Technical Innovation win for Kimberley

Kimberley Robertson, Production Superintendent at the Ichthys LNG onshore facilities was announced as the winner of the SKYMAX Technical Innovation award category at the 2022 NT Women in Resources awards.

Kimberley is the youngest and first female Superintendent at Ichthys LNG in Darwin and is a role model and mentor to other female professionals, engineers and students.

Kimberley grew up in Brisbane where she achieved a Bachelor of Mechanical Engineering (Honours) at the University of Queensland.

Already singled out for high achievement with a Dean's Commendation at the university, Kimberley secured a job at Queensland Gas Company before it was acquired by large British multi-national oil and gas company, BG Group.

This opened up opportunities for Kimberley to work as a project engineer around the world, including in Egypt and then Trinidad and Tobago. She returned to Queensland to work in Gladstone as a Rotating Equipment Engineer at BG Group's Queensland Curtis LNG operations during its construction, commissioning and initial operating phase on Curtis Island.

Onshore Production Superintendent Kimberley Robertson accepts the 2022 Excellence in Technical Innovation award from Max Lye, CEO of Skymax at the 2022 NT Women in Resources awards.

With this experience under her belt, Kimberley secured a job with INPEX in 2015 to work as an Operations Rotating Equipment Engineer at Ichthys LNG in Darwin.

Since then, she has worked on preparing and commissioning major rotating equipment packages, frontline support to start-up operations, operations support as the project successfully moved to production in July 2018 and major maintenance oversight.

"It's a real honour to be recognised for the engineering investigations which I have undertaken to support continued safe and stable operations at Ichthys LNG. It was a fantastic opportunity to work with international experts to deliver solutions and has been equally challenging and rewarding," Kimberley said.

NAIDOC Lifetime Achievement Award

INPEX was delighted to congratulate HR Business Partner, Kelvin Costello on receiving the 2022 Lifetime Achievement Award at the Darwin NAIDOC Ball.

The Lifetime Achievement Award is among the most prestigious commendations and recognises an individual for their lifetime commitment to Aboriginal and Torres Strait Islander communities.

INPEX HR Business Partner Kelvin Costello receiving the 2022 Lifetime Achievement award at the NAIDOC ball from Michael McGregor, Price Waterhouse Coopers.

Kelvin is a proud Larrakia man and is part of the Roman/Danks Family Group, his family are recognised members of the Danggalaba Clan (Crocodile) and are well known throughout the Top End community.

He has been CEO of a number of organisations, such as Ironbark Aboriginal Corporation and Larrakia Nation Aboriginal Corporation. He also helped establish the Larrakia Development Corporation (LDC) and was in a non-executive director role for almost 10 years.

Kelvin has been working alongside INPEX since 2012 before joining us four years ago in the Human Resource team, based at the Ichthys LNG onshore operations facility in Darwin.

A key role model for Kelvin was his mother, who raised four children as a single parent. Kelvin also sought inspiration from strong Larrakia leaders such as Bill Risk and his Uncle Bill Danks.

"I think all Australians have acknowledged and embraced self-reflection in relation to First Nations people. I am proud to be a Larrakia man living on my ancestral country" Kelvin said.

He said this award recognises his work to advance the interests of Larrakia people in relation to protection of Larrakia sites, history and the economic development and social inclusion of Larrakia and other Indigenous peoples.

"This to me is an acknowledgement of the hard work that has been done and the hard work to come, to ensure quality of life and prosperity for Larrakia and other Indigenous people and I am truly grateful."

Community Partnerships and highlights

Foodbank NT School Breakfast Pilot Program

INPEX-led Ichthys Joint Venture has been a proud supporter of Foodbank NT for a number of years and is pleased to support the new School Breakfast pilot program.

The School Breakfast program aims to combat hunger and increase school attendance by providing a free daily breakfast to students.

In late 2022, INPEX Corporate Social Responsibility and Tokyo Sustainability team members teamed up with Foodbank NT to deliver breakfast at Batchelor Area School, approximately 100 kilometres south of Darwin. The team cooked more than 100 egg-in-a-hole and sausages for students and families at the school.

Foodbank and INPEX cooked up a big breakfast at Batchelor Area School.

Principal Corporate Affairs Advisor NT Cara Burke said, "We're very proud to support the incredible work Foodbank NT does and it was great to be able to volunteer at the breakfast BBQ in Batchelor, with our colleagues from Perth and Tokyo.

"The experience brought us a deeper understanding of the School Breakfast Pilot program and the mammoth effort it takes to deliver breakfast staples to regional areas in the Top End. A huge congratulations to Foodbank NT for getting this program off the ground," Cara said.

Since the pilot program commenced in Term 3 of this year, Foodbank NT has increased from 24 participating schools to 26 and hopes to be in full implementation phase by the 2023 school year.

Happy Star-mas at the Starlight Christmas party

In 2022, INPEX was delighted to enter a new partnership with the Starlight Children's Foundation to support the operation of the Starlight Express Room at Royal Darwin Hospital.

The Starlight Express Room is the only treatment-free space in the hospital for children and their families to access a range of facilities and recreational activities, socialise and enjoy time away from the stress of the wards during their stay in hospital.

The Starlight team reached out with an opportunity to help the Captains out at the annual Star-Mas Christmas party.

In order to make the event extra special, INPEX elves put a call through to the North Pole and invited Santa to the party.

Santa also visited children on wards to deliver presents and had his photo taken with hospital staff who were thrilled to see the man in red.

INPEX and Ichthys LNG have proudly supported Starlight Children's Foundation since 2012, most recently through Ichthys LNG's Perfect Day safety fundraising initiative, and we look forward to growing this partnership and further volunteering and engagement opportunities in coming years.

INPEX volunteered to help the Captains and Santa at the Star-Mas Christmas Party at the Starlight Express Room.

NT Volunteer of the Year Awards

INPEX was pleased to once again sponsor the 2022 Northern Territory Volunteer of the Year Awards, with this year's event celebrating 40 years of community volunteering.

We would like to especially congratulate the winners in the INPEX Community Volunteer Organisation/Team of the Year Award, Darwin Community Legal Service, Kindness Shake and Red Cross - Connected Women Program, presented by Cameron Lockley, INPEX NT Corporate and Property Supervisor.

Gran Fondo

INPEX was a proud supporter of the annual Top End Gran Fondo 2022 event which saw hundreds of cyclists hop on their bikes in July.

Gran Fondo, meaning "big endurance", is a long-distance, timed cycling event that welcomes competitive, amateur and recreational cyclists of all abilities.

Six cycling events were on offer including the inaugural INPEX Fondo event, a nine-kilometre cycle geared towards families.

Well done to INPEX General Manager Onshore Operations, Dave Dann, alongside team members Cameron Lockley and Jarryd Page who braved the 145-kilometre challenge, placing 16th, 12th and 11th respectively!

NAIDOC week

The INPEX team proudly joined NAIDOC Week celebrations, supporting this year's theme 'Get Up! Stand Up! Show Up!' for systemic change.

INPEX supported a range of celebratory events including the Flag Raising ceremony in State Square (Larrakia Park), the Larrakia Seniors Lunch, the Jack Ah Kit Memorial NAIDOC Golf Day and alongside our contractors, delivered a hearty NAIDOC barbeque breakfast for approximately 1200 people before the annual march.

CEO Sleepout

In June, NT General Managers Dave Dann and Roland Houareau swapped their cosy warm beds to spend the night on a cardboard mattress at Fannie Bay Gaol, raising awareness and funds at the annual Vinnies CEO Sleepout.

Armed with a sleeping bag, a torch, and Harry Potter pyjamas (Roland) the GMs joined NT business leaders and participated in educational workshops throughout the night to understand some of the factors which lead to homelessness.

General Manager Onshore Operations Dave Dann said participating in the CEO sleepout was a great opportunity to raise awareness and funds for a great cause.

"Although it was mildly rough for us, it was only one night, hopefully it can positively impact the efforts of Vinnies in providing critical support on the ground here in the NT.

INPEX NT General Managers Dave Dann and Roland Houareau raised more than \$17,000 for the Vinnies CEO sleepout.

"The evening activities raised awareness of the issues many homeless people deal with on a daily basis," Dave said.

"We want to thank everyone for their kind and generous donations and to INPEX for match-giving our target of \$7,000, bringing our tally to more than \$17,000."

"A big thanks also to our site-based team for organising a fundraising breakfast the morning after the sleepout," Dave said.

The INPEX General Management team raised the highest amount of funds in the NT for the CEO Sleepout.

Supporting Education and Training for Territorians

Leaders of Tomorrow

In collaboration with the NT Department of Education, INPEX supported two cohorts of the 'Leaders of Tomorrow' program which saw selected groups of high-achieving Aboriginal and Torres Strait Islander students partake in a three-day business trip.

The business trip included a stay at a hotel and a day in the life of working for a global energy company, visiting both the INPEX-operated Ichthys LNG onshore facilities and the Darwin-based corporate office.

"I liked going to Ichthys LNG and learning about the different jobs. I was fascinated by the turbines and I really enjoyed the site tour." – Hayley Willis

"The visit to the Ichthys LNG onshore processing facility was a great experience. I enjoyed the tour and learning about some of the roles within INPEX. I personally liked it when the staff members talked about their journey into working at INPEX and learning about their different experiences. Also, the bus tour was amazing, we were able to see the plant up close and learn about each part of the facility." – Lolita Chavalier-Roberts

The students also had a rare opportunity to view a turbine up close in the onshore workshop, experience a waterside tour of Ichthys LNG and a business dinner at popular Darwin restaurant Hanuman.

Image above: The INPEX team supported students with a business trip experience in Darwin.

Michael Long Learning and Leadership Centre

The INPEX-led Ichthys Joint Venture has proudly partnered with AFLNT since 2009 and Michael Long Learning and Leadership Centre (MLLLC) since 2016.

The MLLLC aims to support and empower Aboriginal and Torres Strait Islander youth through leadership and educational opportunities, encouraging school engagement and personal growth for every young person.

Recently, INPEX team members were invited to meet with students from Milingimbi, Wadeye, Papunya, Elliott and Borroloola at a weekly session during Term 4 for a chat about the activities and highlights from their week in Darwin.

INPEX's team also presented awards celebrating students who best demonstrated MLLLC's values throughout the week: 'standing strong', 'feeling good', 'one mob' and the 'INPEX deadly leader' award.

INPEX General Manager Onshore Operations, Dave Dann, was delighted to meet with students from Wadeye.

"It was great to hear from the students about some of the 'firsts' they experienced such as being a passenger on a plane and seeing the ocean for the first time and most importantly, hearing the students reflect on personal growth during what is a life-changing week for young people," David said.

The MLLLC programs are delivered to a number of communities across the Northern Territory, with 'Make Your Mark' the current core program, run both on Country and in Darwin as a week-long residential camp.

STEM Academy Support

INPEX was pleased to support the Young Indigenous Women's STEM Academy's debut science, technology, engineering and mathematics (STEM) Camp which took place in Darwin.

The Academy is proudly funded by the National Indigenous Australians Agency (NIAA) and delivered by CSIRO in partnership with CareerTrackers.

INPEX was especially proud to see Rikki Bruce a Jawoyn and Waanyi woman from Katherine and Jamie Collins, an Eastern Arrente woman from Alice Springs, speak about their roles as part of the INPEX workforce. The program has been designed to combine STEM extension activities and individualised support for participants.

Students travelled from all over the Northern Territory including Alice Springs, and Katherine to attend the three-day camp.

CSIRO's Young Indigenous Women's STEM Academy which took place in Darwin was a huge success. place in Darwin was a huge success.

TRACE fourth-year apprentice Doni Robertson talks to students about his job.

INPEX Foundation extends reach to Australia

INPEX Scholarship Foundation was pleased to launch a new scholarship program in Australia in 2022, with opportunities available for Australian students to study a postgraduate university course in Japan.

Jiro Okada from the INPEX Foundation returned to Darwin to meet with key stakeholders and discuss opportunities to support the next generation of students through the Foundation.

INPEX Foundation has been providing scholarships to students from Indonesia and Japan over 40 years to promote mutual relationships between the two countries and in 2022 expanded its programs in Australia and United Arab Emirates. For more information visit INPEX SCHOLARSHIP FOUNDATION (inpeX-s.com)

Mr Jiro Okada engaged with students and INPEX scholarship recipients at CDU about the new INPEX Foundation Scholarship program.

Bright Future STEM

INPEX and TRACE were proud to take part in the 'Bright Future STEM program' which showcases Science, Technology, Engineering and Maths and the diversity of career opportunities within the resources and energy industry in these exciting fields.

This program is designed and delivered by Australian Resources and Energy Employer Association (AREEA) and introduces students to STEM industry role models who highlight what they love most about their rewarding STEM careers in the resources and energy industry and focuses on hands-on, interactive activities and experiences all relatable to the real world.

The program was run at Wagaman Primary School, Leanyer Primary and Stuart Park Primary working with 9 to 12-year-old students (particularly girls) to build the next generation of STEM professionals.

Charles Briston, INPEX Corporate Coordination Officer said the kids loved meeting and hearing from the young trainees at INPEX.

"It was awesome to see the students get excited about the activities and realising that it could be them in a few years," Charles said.

Supporting Industry

2021 Meet the Buyer

For the second year running, INPEX was proud to be naming rights partner with the Energy Club NT's 'Meet the Buyer' event.

This special event takes place ahead of NT Resources Week for local NT businesses to demonstrate capacity and proven experience in the resources sector and an opportunity to meet with operators and contractors in a 'speed dating' style networking event.

INPEX Implementations and Purchasing team members were pleased to participate in the event, including the one-on-one networking sessions and an address by Onshore Implementation Manager, Mark Wilson.

Stuart Miles, Mark Wilson, Robby Timney and Luke Manison from the Onshore Operations team engaged with suppliers at the ECNT 'Meet the Buyer' event.

ECNT CCS Dinner

In April, INPEX sponsored the Energy Club NT's Industry Dinner 'Our Future of Carbon Capture and Storage' featuring an update from Matt Steyn from the Global CCS Institute.

Phil Grainger, INPEX Vice President Growth addressed the audience and provided a business update.

Chief Minister's Export Awards 2022

INPEX was a proud sponsor of the 29th Chief Minister's Northern Territory (NT) Export Awards.

The NT is a significant contributor to Australia's national trade and the 2022 awards showcase the Territory's outstanding export businesses.

INPEX congratulates all winners across this year's categories of small business, agribusiness, resources, manufacturing, professional services and regional exporter.

As operator of Ichthys LNG, INPEX is proud to be part of the Territory community and contributing to positive outcomes – through jobs, training and social and economic benefits. Chief Minister's Export and Industry Awards.

INPEX General Manager NT, Stuart Knowles, presents the team from Plant Sensors with the Sustainability award.

Women in Resources Awards

INPEX was pleased to sponsor the Women in Resources NT Awards which took place in June 2022. Dave Dann, General Manager Onshore Operations presented the INPEX Outstanding Tradeswoman/Operator/Technician award to Tanya Nakata.

Aboriginal engagement

Bright future for Larrakia ranger

Spotting migratory birds returning from Siberia or watching dolphins frolicking in Darwin Harbour – every day is different for Larrakia Ranger Steven Dawson.

Steven started working with the rangers for work experience through Darwin High School in 2013. Now 28, the proud Larrakia man is following in the footsteps of his uncle as a full-time ranger and leads a team of 14 Larrakia Rangers.

Larrakia Rangers perform regular surveys of shorebirds, turtles and megafauna, including dolphins and whales in Larrakia Sea Country as part of a Darwin Harbour Biodiversity Study funded by the Northern Territory Government's Aboriginal Ranger Grants Program which is open to ranger groups across the Territory.

In 2022, the program, managed by the Department of Environment, Parks and Water Security received A\$ 24 million from the INPEX-operated Ichthys LNG under its Coastal Management Offset Fund.

The rangers do an annual migratory shorebird survey in October as part of their biodiversity study.

As part of the biodiversity study, Steven can be out on a boat for an hour to collect water samples, or five hours looking for migratory shorebirds as they forage for food on the mud flats of Darwin Harbour.

Career expo at Ramingining

In May, INPEX and our contracting partners supported a Career Expo, hosted by Arnhem Land Progress Aboriginal Corporation (ALPA) in the community of Ramingining.

More than 100 people from the community (with a population of about 900 people) came to the expo also featuring CDU team members, a local band, and local emergency services also participated with stalls and clinic offering flu shots.

Following the expo, two members of the community supported by ALPA, TRACE and INPEX, were successful in securing a traineeship at the Ichthys LNG onshore facilities.

INPEX and contracting teams participated in a Career expo, hosted by ALPA in May.

Sharing the Harbour safely

INPEX is committed to sharing Darwin Harbour safely with all recreational and commercial users.

Up to three liquefied natural gas (LNG) export carriers and one liquefied petroleum gas (LPG) carrier are received each week at the Ichthys LNG onshore processing facilities at Bladin Point. In addition, up to one condensate carrier is received each fortnight.

The Regional Harbourmaster has declared a marine safety zone restricting access around Bladin Point, including the product loading jetty, to ensure the safety of everyone on the water.

All Harbour users are encouraged to observe the Harbourmaster's marine safety zone, available at Marine safety – <https://nt.gov.au/marine/marine-safety>

INPEX is committed to engaging with Territorians

INPEX is committed to keeping Territorians informed about INPEX and Ichthys LNG activities. We use a range of tools including community feedback lines, advertising, industry forums, traditional and social media. We value your feedback and managed more than 350 direct enquiries in 2022.

Territorians – areas of interest

General enquiries about Ichthys LNG onshore facilities
Career opportunities
School engagement opportunities
Business opportunities
Career and training opportunities
Opportunities for Aboriginal and Torres Strait Islander peoples
Funding / sponsorship requests

Community Partners – areas of interest

Impacts of COVID-19 on program delivery
Request for support for in delivering initiatives which align with INPEX priorities: Health and Wellbeing, Education and Training, supporting Aboriginal and Torres Strait Islander peoples, business capacity building and community events
Sponsorship and long-term partnership opportunities
In kind support and opportunities to collaborate with INPEX including employee engagement and volunteering
Capacity building opportunities, workshops and training

Government – areas of interest

Key Ichthys LNG onshore activities and future business growth prospects
Educational engagement about operational matters
Engagement opportunities with senior INPEX representatives based in and visiting Darwin

Business community partners – areas of interest

Key Ichthys LNG onshore activities and future business growth prospects
Opportunities to support Ichthys LNG and INPEX business activities
Opportunities to collaborate and share success stories
Speaking opportunities at industry events
Opportunities to engage with INPEX personnel
Opportunities to support business and industry events
Opportunities to share success stories externally via traditional and social media.

INPEX team activities in 2022

358 community feedback enquiries addressed
Regular social media updates
Timely updates in local media including Territory Q, NT News and ABC Radio
Supported the delivery of educational programs in the NT
More than 200 face to face meetings with NT stakeholders
Environmental plan consultations

INPEX team activities in 2022

Proactively engaged with all community and sponsorship partners with assurance of continued and flexible support despite uncertainties around COVID 19
26 community organisations delivering programs in the NT supported in 2022, including 10 partnerships and 16 sponsorships
Two new CDU scholarships awarded in 2022
New partnership with Starlight Children's Foundation to support Starlight Express Room at Royal Darwin Hospital
INPEX Foundation scholarships launched in Australia
Hosted capacity building workshops with Social Ventures Australia for partner organisations

INPEX team activities in 2022

Briefings and updates with Federal politicians, NTG Ministers and Departments
Worked proactively with NTG to manage COVID-19 impacts
Hosted Federal and international delegation waterside and bus tours of Ichthys LNG onshore facilities
Hosted NT Chief Minister in Tokyo
Statement of commitment signed between NTG and INPEX

INPEX team activities in 2022

Regular face to face meeting with peak body representatives
INPEX representatives volunteering on various committees and boards including NT Chamber of Commerce, Energy Club NT and Women in Resources
Regular representation including speaking roles at NT Chamber of Commerce, Palmerston Regional Business Association, Energy Club NT and Women in Resources events.
Collaborated with NT Chamber of Commerce to co-host breakfast event welcoming INPEX CORPORATION President and CEO, Ueda san
Naming rights sponsor of the Energy Club NT's 'Meet the Buyer' event
Associate membership of NT Indigenous Business Network.
