

# Village Masterplan

The Village will accommodate 2700 workers anticipated at the peak of construction of the onshore gas processing facilities at Blaydin Point.

The Village could be expanded to house up to an additional 800 workers if required.

The Masterplan above shows the fully expanded option.

A workforce of 200-300 will be required in Darwin to construct the Village.

Village construction will take approximately 2 years to complete.

The Village will be made up of buildings and purpose-built central facilities, including:

- Temporary accommodation units
- Medical centre
- Administration building
- Indoor and outdoor sports facilities including swimming pool
- Recreation building
- Dining facilities
- Central bus port and car parking
