

# Staging Construction of the Village

Construction of the Village will be completed in stages, in line with the number of people accommodated at the Village.

The size of the Village population relates directly to the types and numbers of workers required at Blaydin Point over the 5-6 year construction period.

INPEX anticipates that the Village will be at peak capacity in year four on onshore facility construction (2015).

The first stage of construction will begin in Q2 2012.

All images are indicative only and subject to change in the final design. All images remain the property of the Ichthys Project and must not be copied or distributed without the prior written consent of INPEX.
