## Ichthys Project Onshore LNG Facilities Update

### Ventia Wins Bladin Point Cup

*Above: Winning Ventia players and their supporters.*

The sixth Ichthys Project Onshore LNG Facilities' Subcontractor Sports Challenge has attracted the most ever participants, who along with their families and friends, filled up the Top End Indoor Sports Centre in Woolner last Saturday.

Twenty teams took part in the mixed indoor soccer tournament.

The round robin style event came to a head with the final between teams made up of Ventia site maintenance workers and Kentz commissioning workers on the Project's second LNG train.

Richard Hughes from the winning Ventia team said it was the first time his colleagues had played soccer together.

"Once we got over the first game we clicked pretty well and the goals started flowing in," he said.

JKC Reward and Recognition Coordinator Brigitte Brown congratulated everyone involved.

"It's a great opportunity for employees working on different areas of the Project to come together for a bit of fun and some healthy competition," she said. "The intensity and passion on the courts was nearly as high as the humidity."

Previous challenges have tested Project workers' prowess in rugby 7s, touch rugby, netball, volleyball and indoor cricket.

### Howard Springs Accommodation Village Turns Four

Since first opening four years ago, Manigurr-ma Village has welcomed more than 17,000 individual residents to the purpose built accommodation facility at Howard Springs.

Named Manigurr-ma after the Larrakia name for the Stringybark tree, the Village is currently home to more than 3,000 of the Project's temporary Fly-In Fly-Out workforce. It has also played host to charity fundraising events and visits from comedians such as Dave Hughes.

"To see the Village evolve from the original concept to meeting the demands and changes of the Project while providing a high standard of accommodation services is something the whole team can be proud of," JKC Village Coordinator Scott Crosbie said.

## Project Transport

The following information is to inform the community of vehicle movements associated with the Project.

Transporting the Project workforce is a complex and highly organised logistical operation. The majority of our construction workforce are transported by JKC's bussing subcontractor, Buslink VIVO. Some workers also commute in site specification light vehicles.

In undertaking bus transportation, as with everything we do, the safety of the community and our workers is our highest value. We all need to safely share our roads and highways. We travel along routes approved by the Northern Territory Government as shown below.

## Project Transport

JKC advises transport to and from our sites for the period of 28 October to 9 November 2017

### Bussing

*Please note each bus may be used more than once from different locations*

- 33 buses daily carrying workers from Darwin and Palmerston to Bladin Point
- 66 buses daily from Manigurr-ma Village to Bladin Point
- 15 buses daily from Bladin Village to Bladin Point
- One bus every hour from Manigurr-ma Village and Bladin Village to Darwin International Airport
- 22 buses daily from Darwin International Airport park'n'rides to Bladin Point
- 11 buses daily from Yarrowonga park'n'rides to Bladin Point
- Four buses daily from the Coolalinga park'n'ride to Bladin Point
- Four buses daily from the Tulagi Rd park'n'ride to Bladin Point
- Three buses daily from the Syrimi Rd park'n'ride to Bladin Point
- Three buses from Darwin Airport Lodge to Bladin Point
- One social run from Manigurr-ma Village to Darwin and Palmerston from Monday to Friday with up to eight runs on weekends
- One daily social run from Bladin Village to Darwin and Palmerston

### Bladin Point

- Five semi trailers daily carrying material from East Arm Port via Berrimah and Wishart roads, Elrundie Avenue, Channel Island and Wickham Point roads to site
- Two road trains daily carrying crushed rock from Mt Bundey quarry via the Arnhem and Stuart highways, Jenkins, Channel Island and Wickham Point roads to site
- Two road trains daily carrying quarry material from Thorngate Rd quarry via the Stuart Highway, Jenkins, Channel Island and Wickham Point roads to site
- Five road trains / semi trailers daily carrying material from Winnellie via Berrimah and Wishart roads, Elrundie Avenue, Channel Island and Wickham Point roads to site
- Two road trains / semi trailers daily from interstate via Stuart Highway, Jenkins, Channel Island and Wickham Point roads to site

# Marine Activity – Advice to Harbour Users

## Marine Safety Zone

- From 2 October 2017 a new marine safety zone, declared by the Regional Harbourmaster, came into effect in the waters near the Ichthys Project Onshore LNG Facilities
- Please observe the new zone so we can all share the harbour safely
- The Regional Harbourmaster's Notice to Mariners can be found at [www.nt.gov.au/marine](http://www.nt.gov.au/marine)
