Gamirring Experience Centre celebrates and strengthens INPEX connection and understanding

DARWIN, AUSTRALIA – Today on Larrakia Country, INPEX CORPORATION President and CEO, Takayuki Ueda announced the opening of INPEX's Gamirring Experience Centre.

Purpose-built with state-of-the-art immersive technology, the Centre features floor-to-ceiling screens, surrounding visitors with 360-degree visual content to create an all-encompassing cinematic experience.

Named in consultation with Larrakia Nation Aboriginal Corporation, Gamirring, means "to learn" or "learning" in Larrakia language, reflecting the Centre's purpose as a place of learning and discovery.

The Centre will provide people with new ways to learn about INPEX's operations, while building understanding of the company's future ambitions to support energy security and regional decarbonisation through INPEX Vision 2035.

Mr Ueda said the Centre represented an important milestone in INPEX's enduring relationship with the Northern Territory.

"The Gamirring Experience Centre reflects our pride in being part of the Northern Territory, and our commitment to the shared journey ahead. In creating this learning environment, we are aiming to bring together Territorians who may already be part of the INPEX journey, or who want to learn about our story.

"As we celebrate 40 years in Australia, we remain focused on our long-term social and economic contribution to the region, strengthening the partnerships that have shaped our journey and responding to the evolving energy landscape," Mr Ueda said.

Chief Minister of the Northern Territory, the Hon. Lia Finocchiaro MLA, with INPEX CORPORATION President and CEO, Takayuki Ueda.

The Gamirring Experience Centre delivers a new way to experience INPEX's operations, providing stakeholders with a unique perspective of the scale and complexity of Ichthys LNG.

It has been made possible through strong collaboration with Northern Territory businesses, contractors and artists, harnessing local capability, creativity and innovation in its design and delivery.

Designed to evolve alongside INPEX, the Centre will continue to reflect the company's energy operations, low-carbon technologies and future opportunities.

About INPEX: INPEX is Japan's largest exploration and production company, engaged in the development and operation of energy projects worldwide, including Ichthys LNG in Australia as Operator. We are committed to contributing to a brighter future by delivering energy in a sustainable way. As part of this commitment, we also engage in lower carbon solutions such as carbon capture and storage – or CCS – and outside of Australia, in hydrogen and integrated power supply, while pursuing new opportunities in the evolving energy landscape.
